Software Development Plan

1. Introduction

1.1 Purpose

The purpose of the *Software Development Plan* is to gather all information necessary to control the project. It describes the approach to the development of the software and is the top-level plan generated and used by managers to direct the development effort.

The following people use the *Software Development Plan*:

- The **project manager** uses it to plan the project schedule and resource needs, and to track progress against the schedule.
- **Project team members** use it to understand what they need to do, when they need to do it, and what other activities they are dependent upon.

1.2 Scope

This *Software Development Plan* describes the overall plan to be used by the Movie Reviews and Ratings project, including deployment of the product. The details of the individual iterations will be described in the *Iteration Plans*.

The plans as outlined in this document are based upon the product requirements as defined in the *Vision Document*.

1.3 Definitions, Acronyms and Abbreviations

None.

1.5 Overview

- This Software Development Plan contains the following information:
- Project Overview - provides a description of the project's purpose, scope, and objectives. It also defines the deliverables that the project is expected to deliver.
- Project Organization - describes the organizational structure of the project team.
- Management Process - explains the estimated cost and schedule, defines the major phases and milestones for the project, and describes how the project will be monitored.

2. Project Overview

2.1 Project Purpose, Scope, and Objectives

Purpose: Although there are many movie review websites in the world, they are almost foreign websites and are not popular in Vietnam. Our website will provide movie reviews and ratings for everyone (focus on Vietnamese).

Scope:

- Target users: People who love movies, want to see reviews, ratings to choose movies which they want to see. Age: 10+
- Environment:
 - Platform: Web.
 - Language: HTML, CSS, JavaScript and maybe PHP.
 - Tools: Text editor (Visual Studio Code or Sublime text), browser (Chrome, Edge)...

Objectives: To become a popular movie review website in Vietnam.

Main features:

- Review movie

Movie Reviews And Ratings	Version: 1.2

- Comment
- Rate a movie review
- Search a movie review
- Login/logout, create account
- View account history
- View user profile
- Like or dislike a review
- Classify film
- Top ranking movie review
- Report to admin about bugs, spam comments...
- ...

2.2 Assumptions and Constraints

Budget	0 USD
Staff salaries	0 USD
Staff	5 people of team
Schedule	12 weeks
Equipment	All laptops, smartphones of team members

2.3 Project Deliverables

Deliverables for each project phase are identified in the *Development Case*. Deliverables are delivered towards the end of the iteration, as specified in section 4.2.3 *Project Schedule*.

Output of project: Movie Reviews and Ratings website, accompanying documents.

3. Project Organization

4. Management Process

4.1 Project Estimates

This project is estimated to be completed in 12 weeks (05/10/2021 - 25/12/2021).

Movie Reviews And Ratings	Version: 1.2
Software Development Plan	Date: 27/11/2021

4.2 Project Plan

4.2.1 Phase and Iteration Plan

The Inception phase of our project will take 2 weeks to do. It can be viewed as follows:

Task	Start date	End date
INCEPTION	17/10/2021	30/10/2021
Write the first weekly report	20/10/2021	21/10/2021
Project plan	22/10/2021	24/10/2021
Vision document	25/10/2021	28/10/2021
Write the second weekly report	29/10/2021	30/10/2021
Inception complete	30/10/2021	30/10/2021

Our project has 3 phases: Inception, Elaboration and Construction. The phases and the relative timeline is shown in the table below:

Phase	No. of Iterations	Time estimate	Start date	End date
Inception Phase	1 iteration	2 weeks	17/10/2021	30/10/2021
Elaboration Phase	2 iterations	4 weeks	31/10/2021	27/11/2021
Construction Phase	2 iterations	4 weeks	28/11/2021	25/12/2021

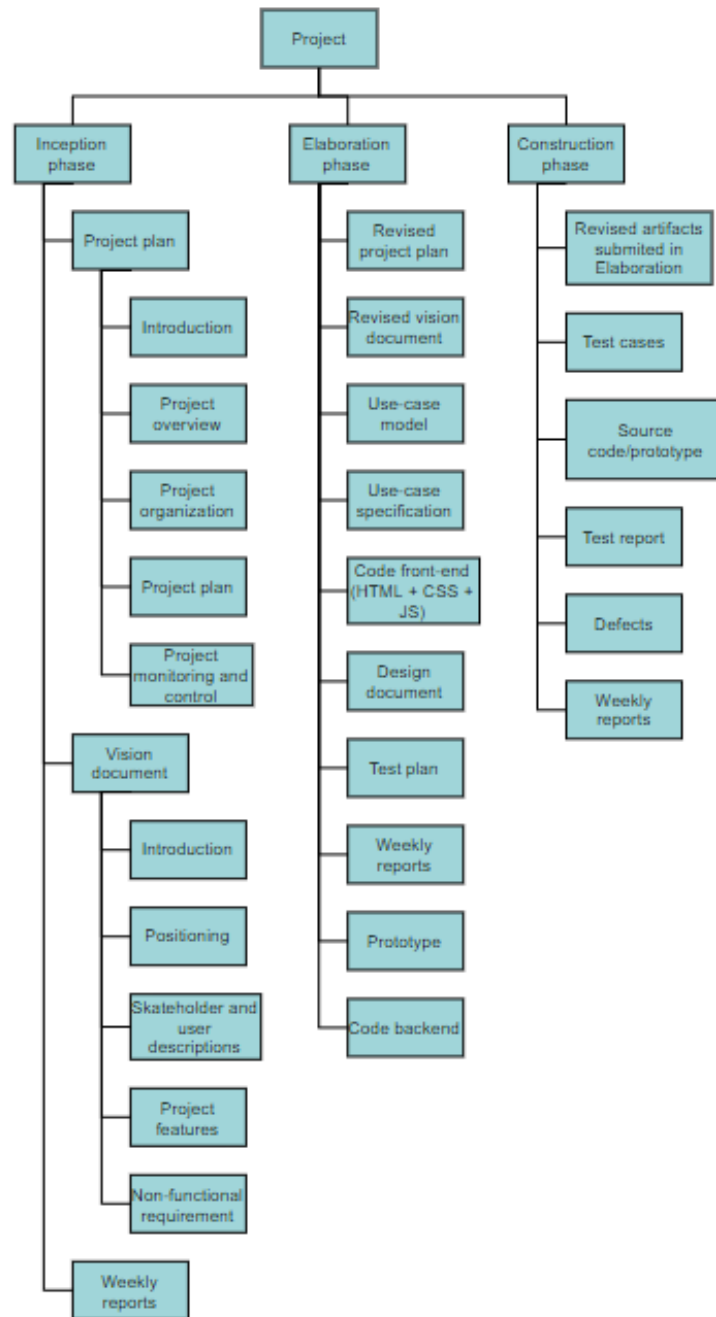

The milestones that mark the end of each phase can be seen in the table below:

Description	Iteration	Milestone
Inception Phase	Only one iteration	<p>In this iteration we have 4 meetings in 2 weeks.</p> <p>In the planning meeting: revised PA0 once more. Take consideration of the comments of TA, and fix it. Read the PA1 requirements and the leader will assign tasks for members.</p> <p>In this inception phase, we focus on project plans, vision documents and write weekly reports.</p> <p>In 2 weekly meetings: after all members have read the PA1 requirements and understand and do it. Every member makes a comment on their work last week, and then moves on to next week.</p> <p>In the review meeting: we revised</p>

Movie Reviews And Ratings	Version: 1.2
Software Development Plan	Date: 27/11/2021
None	

		<p>everything we did and learned from experience.</p> <p>Also in this iteration, we will decide what language, IDE, and browser to create our website.</p>
Elaboration Phase	First iteration	<p>Revised project plan and vision document.</p> <p>Draw a use-case model.</p>
	Second iteration	<p>Design document (including UI prototypes, architecture document). Work on a test plan, use case document with a revised use case model. Analyze the requirements and will develop the architectural prototype.</p> <p>Complete use-case specification.</p> <p>Coding front-end and a little bit about databases (Firebase, MongoDB).</p>
Construction Phase	First iteration	<p>Revised artifacts submitted in Elaboration. Write source code, complete all functions listed in PA0.</p>
	Second iteration	<p>Work on test cases, write test reports, weekly reports and final presentations.</p>

Picture above is our Work Breakdown Structure (WBS)

4.2.2 Releases

After each iteration, our group will release one product for testing. 2 big products will be released after PA3 and PA5. Below is our release schedule:

Movie Reviews And Ratings	Version: 1.2
Software Development Plan	Date: 27/11/2021
None	

Phase	No. of Iterations	Number of release products	Description
Inception Phase	Iteration 1	1	This product includes our website template.
Elaboration Phase	Iteration 2	1	The product is functionally added: login, logout, forgot password.
	Iteration 3	1	The product has an admin management page, movie review detail page and landing page.
Construction Phase	Iteration 4	1	The product will add some functions like change user information, add a new movie review to the favorites list, search a movie review, report bugs to the admin.
	Iteration 5	1	We start connecting to the database, and build the backend. Finally, this product will be our final release.

4.2.3 Project Schedule

Project Schedule is presented here: [Group03 Gantt Chart](#)

4.3 Project Monitoring and Control

4.3.1 Reporting

- Weekly meeting
- Weekly status report
- Planning meeting
- Review meeting
- And some other reports like test reports...

4.3.2 Risk Management

No.	Risk	Affect	Probability	Description
1	Website development is new with us	Project and product	Frequently	Our group has to spend more time learning HTML, CSS, and JavaScript.
2	Firebase realtime database is new with us	Project and product	Likely	This is the first time we use Firebase. We don't use MongoDB because it's so popular. In order to become acquainted with NoSQL, we spend a lot of time learning.
3	Lack of creative	Project and product	Likely	We are building this movie review website from zero. So, every member has to think more creatively, and work hard to build a good website. Since we're new we can sometimes hit a dead end.
4	Some members have some	Project	Occasional	The problem with fiber optic that make some

Movie Reviews And Ratings	Version: 1.2
Software Development Plan	Date: 27/11/2021
None	

	problems with the internet during online meetings.			members can't access Zoom meetings.
5	Some members get headaches and fever after being vaccinated.	Project	Seldom	After being vaccinated, some members have a bad feeling.
6	Member turnover.	Project	Unlikely	During the project, some members may leave because of personal reasons.
7	Some bugs occur during coding.	Project and product	Likely	Bugs are inevitable, so during coding we will fix it one by one...
8	Some software we use requires money to activate.	Project	Seldom	There are some software we need to use like: MS Project, StarUML that require us to buy a license. So we need to buy the license to use it or we can use another software like Gantt Chart.
9	Member's abilities aren't suitable	Project and product	Seldom	When the leader assigns tasks to members. There will be some tasks that aren't suitable for them.
10	Merge code together	Product	Frequently	After some time of working, we need to merge our code together. But this is really hard, we need time to change some color (front-end). By the way, we will solve it after some group meetings.

4.3.3 Configuration Management

- Google drive: storing and sharing documents, files,...
- Github: storing and managing source codes and related files,...
- MySQL server: application's database
- Zoom: connect people to have a meeting, discussing
- Some websites support for diagram such as figma
